cation
- R. W. Solomon, A. B., Superintendent of Schools, Fostoria, School
Administration
- W. P. Starkey, A. B., Superintendent of Schools, Bowling Green,
Mathematics
- Clara Tangeman, A. B., Teacher of Home Economics, High School,
Lima, Home Economics
- Carle O. Warren, A. B., Teacher of Mathematics, Horace Mann
School for Boys, Mathematics

HISTORICAL SKETCH

In 1910 the General Assembly passed an act authorizing the Governor to appoint a commission to locate two new normal schools, one in Northeastern Ohio and one in Northwestern Ohio. This commission chose Kent as the location of the school for Northeastern Ohio and Bowling Green as the location of the school for Northwestern Ohio. On June 30, 1911, the Board of Trustees, appointed by the Governor, organized and on February 16, 1912, elected the President of the College. A general building plan was adopted and with the initial appropriation of \$150,000 the Board proceeded with the construction of the central feature of the plant—the Administration Building. In 1913 the General Assembly appropriated \$41,000 for enlarging the auditorium and gymnasium in the Administration Building, and \$218,000 for the erection of a dormitory for women, science building, and heating plant. Other available funds were added to the appropriation for the heating plant, making the total cost of this building and equipment \$48,175. In 1915, \$100,000 was appropriated for a training school building. The Dormitory for Women was opened at the beginning of the Summer Session in June, 1915, and the Administration Building in September, 1915. The Heating Plant was put in service in the autumn of 1915. Early in the spring of 1916, the Science Building was far enough advanced toward completion to permit of the use of some parts of it. In May, four rooms of the Training School were transferred from

the Administration Building to this building and other parts were used for College classes. The entire building was thrown open for use during the Summer Session. The contract for the construction of the Training School Building was let in July, 1916, and the building will be ready for use at the opening of the next regular academic year in September, 1917.

On September 15, 1914, the College opened in temporary quarters with a faculty of fifteen members including four critic teachers. During the year 1914-15 a branch school was conducted in Toledo, the city training school having been discontinued. The initial enrollment was 158, and the total enrollment from September to June exceeded 300 different students. In September, 1915, the faculty was increased to twenty-four members by the appointment of instructors to new positions as follows: Head of the Department of Rural Education, Extension Lecturer, Head of the Department of Geography, Head of the Department of History, Head of the Department of Physical Education, High School Inspector, Fifth Grade Critic, and Sixth Grade Critic.

GENERAL INFORMATION

LOCATION

Bowling Green, the seat of the State Normal College, is a city of seven thousand inhabitants, situated near the center of the Northwestern Ohio Normal School district, in a beautiful and healthful location easily accessible from all parts of the district. It is a substantial business city in the center of a prosperous agricultural community and combines all the characteristics of a model school town. The citizens are deeply interested in the welfare of the College, and the educational and moral tone of the community is wholesome and helpful in the highest degree.

CLIMATE

The climate of Bowling Green is favorable to study, extremes of temperature being modified by the proximity of Lake Erie.

RAILROAD FACILITIES

Bowling Green is situated on the main line of the Toledo and Ohio Central Ry., and on a branch of the C. H. & D. which makes connections at Tontogany with the main line. It is also situated on a branch of the Toledo, Fostoria and Findlay Electric which connects with the main line at Pemberville, the Hocking Valley Railway, and the Eastern Division of the Toledo and Ohio Central. It is also situated on the Toledo, Bowling Green & Southern Electric, which makes connections with the B. & O. at North Baltimore, and at Toledo with all railways entering the city.
